Hi Dear Parents,

China Education Panel Survey is the first large-scale, nationwide, and longitudinal social survey of junior high students in China. The purpose of CEPS is to provide detailed and reliable data for the study of the current situation and future development of China's primary education.

CEPS is jointly conducted by the National Survey Research Center (NSRC) at Renmin University of China and academic institutions throughout the country. During the academic year 2013-2014, we are going to survey nearly 20,000 students as well as their parents, homeroom teachers, subject teachers and school administrators across the country. Through scientific sampling, your child and you have been chosen as subjects of this survey. Therefore, we are asking you here to complete this questionnaire and we are very grateful to your understanding, support and help!

There are neither right nor wrong answers to these questions and your answers will not be used to evaluate your child and you. Therefore, please answer all the questions truthfully based on your own ideas and experiences. We pledge here that under the *Statistics Law of the People's Republic of China*, we will hold all the information you are going to provide in strict confidence and it will never be given away to any particular individual or institution. Thank you for your cooperation.

When answering a multiple-choice question, please circle the number of your choice; when answering a blank-filling question, please write down words or numbers on the lines in the square brackets.
